

BRICKSTOP REVERSIBLE ALUMINUM PAVER EDGING

BrickStop Edging bends to your needs no matter how complex your interlocking brick and paving stone design. Made of aluminum, it's strong enough for straight lines, yet flexible enough to follow the most intricate curved patterns, with optional installation of pavers on either side of the edging.

- Durable • Flexible • Easy to install

BrickStop prevents the shifting and movement of pavers that could turn your project into an eyesore. BrickStop comes through with a patented design that lets you form 90° angles without cutting. It's quick "either side" installation helps bring labour costs down and creates the long lasting results that will keep customer referrals coming year after year.

BrickStop Reversible Edging –
because your reputation is at stake.

Check out the BrickStop Edge:

**Count on it
because your
reputation is
at stake.**

- Convenient 8'4" lengths
- Made of non-rusting recycled aluminum
- Allows installation of pavers on either side of edging
- Completely hidden from view
- One piece for straight or curved patterns
- 90° angles without cutting
- Will not warp in heat or crack in cold
- No loss of material due to overlap at joints.

Horizontal wall has equally spaced V-shaped cutouts of at least 90° for flexibility and equally spaced flanges with countersunk hole for flush fitting of spiral nails. Vertical wall is ridged for extra strength.
